About Us

Kennz Technologies is ISO 9001:2008 certified Company well-known name in sphere of filter manufacturing, Exporting importing and supply of various types of RO system. Kennz Technologies is an Indian company was established 2005 doing Water & waste water treatment project.

Journey of more than 11 years, the company has made phenomenal progress under his leadership expert guidance.

Services

Kennz Technologies deals with Domestic, Commercial, and Industrial Water treatment.

It also manufactures packaged RO systems with single & double stage systems for ground, bore well, well, river and sewage water applications in standard capacities of portable water production. The capacities range anywhere from 8 Liter/hr to 50000 Liter/hr and we are diversified in our approach with single, double, and triple tube water filters which come with and without UV attachments as well as softeners and water iron remover in various capacities. If the need be Kennz water treatment can custom design, manufacture and install its systems to meet your specific requirements. We have supplied more than 5500 industrial plants for various needs such as bottled water

manufacturing, soft drink manufacturing, hospitals, villages, schools, colleges, industries, corporate offices, radiators of earth moving equipments etc. More than 85000 domestic RO plants till date and we strive to maintain state of the art technology and equipment to assist our engineers in the selection and designing of the most effective RO systems according to the type of raw water available to each of our clients.

Our Range of Products

- Sewage Treatment Plant
- Effluent Treatment Plant
- Reverse Osmosis System
- Swimming Pool Plant
- Ultra Filtration System
- Activated Carbon Filter
- Ozone Generators
- Waste Water Treatment
- Dual Media Filter
- Iron Remover System
- Softner System

Sewage Treatment plants

KENNZ TECHNOLOGIES offers a high quality sewage water treatment systems.

Process
Two types of processes are commonly used for treatment and |recycle of sewage water. These system works based on biological treatment method. We offered both systems. One is conventional and another one is packaged – FMR (fluidized media reactor).

Water Demineralisers

KENNZ TECHNOLOGIES Demineralisers are designed based on latest coast effective ion exchange technique of counter current regeneration.

KENNZ TECHNOLOGIES Demineralisers consists of acid/alkali proof pressure vessel with internal fittings and initial charge of Cat ion and Anion exchanger, set of regeneration equipment, hydraulic ejectors, acid and alkali tanks and conductivity meter to monitor treated water quality.

Reverse Osmosis Plant

Reverse Osmosis System
The membrane Technology is advancing in single & double stage which reduce rapidly the waste water than any other separation methods and its versatility offers the greatest potential for solving water management and liquid problems.
